Sick Building Syndrome

Buildings often reduce the inflow of fresh indoor air which can lead to a high concentration of harmful air borne particulate such as:

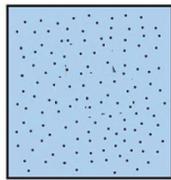

- Dust, pollen, and chemicals which can trigger allergies, cause headaches and more
- Germs and viruses that can make employees sick (ie. flu) and spread from person to person

JUST ONE HOUR OF BREATHING may expose you to this number of airborne particles on an average day:

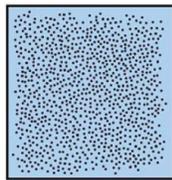

HOSPITAL OPERATING ROOM

< 75,000

WALK-IN CLINIC

< 3,500,000

GENERAL OFFICE [average day]

< 20,000,000
